System setup

1 **INSTALL** the AC power cord
→ Immediately, the *Status LED* on the main unit lights up

2 You should see the player boot up screen as shown in right

3 **WAIT** while player boots up
→ once you see "Basic settings" on screen, the unit is ready for content update or menu configuration

4 **PLUG IN** a USB mouse to the unit's USB port

5 **Enter** the corresponding configuration option by moving the mouse cursor over the configuration and click on the option to enter

→ Using the USB mouse, click on "Wireless LAN" to enter Wireless configuration and provide security information to connect to your wireless access point

→ *find and set the correct time/date AND time zone*.

IMPORTANT: time zone must be set correctly in the menu or via management software for scheduled playback

→ (OPTIONAL) *Set a Password* in the menus to prevent unauthorized changes.

 IMPORTANT: Password will be asked while enter the setup menu during playback

6 **Click** *Set content* button to configure your signage appliance to the content service if needed

→ For advanced player configuration, such as static IP, display resolution, and firmware update, visit www.digisignage.com for more information
