

# Scala RSS widget for IAdea media appliance

IAdea support team

# Scala Content Manager configuration

1. Obtain “Scala-RSS-widget.wgt” from IDea support.
2. Access Scala Content Manager with the administrator permission then select “Media Metadata” in system option.
3. Click “+” button to create few RSS properties.

Name	Data type	Value Type	Comment
RSS.urls	String	Any	Target RSS source
RSS.color	String	Any	RSS background color (Hexadecimal)
RSS.downloadFrequency (minute)	String	Any	RSS content update interval.

<input type="checkbox"/>	Name	Data Type	Value Type
<input type="checkbox"/>	Medialtem.Scala Streaming	String	Any
<input type="checkbox"/>	Medialtem.RSS.urls	String	Any
<input type="checkbox"/>	Medialtem.RSS.color	String	Any
<input type="checkbox"/>	Medialtem.RSS.downloadFrequency	String	Any

4. Upload the widget as a media object to Scala Content Manager.
5. Find the widget in media items then click “metadata” to fill out all necessary information for the RSS ticker.

Scala-RSS-widget.wgt (Widget)

Properties Metadata Media Information History Approval Preview

MediaItem.Scala Streaming:

MediaItem.RSS.urls:

MediaItem.RSS.color:

MediaItem.RSS.downloadFrequency:

6. Assign the widget into a playlist.
7. All done.

**Thank You**
