

Manager Express

Digital Signage Management Software

Highlights

- Device auto discovery on network
- Publish PowerPoint slideshows
- Weekly or looping playlist creation
- Auto-update contents via widgets
- Multi-zone content layouts

Works with

XDK-081 XDS-101/104

480P

480P

XMP-120/130 XDS-151

KAVALAI

Manager Express is an easy-to-use software for streamlined digital signage scheduling and delivery.

Device auto discovery on network

Manager Express lets you discovery all IAdea players on your network by 1 simple click.

Publish PowerPoint slideshows

Manager Express seamlessly converts your original PowerPoint slides for playback and lets you schedule slideshows along with videos, music, and photos. Your contents are presented as still-frame slide sequences on any combination of IAdea media players. (PowerPoint must be installed in order to edit and convert slides)

Weekly or looping playlist creation

Create playlists to present your content in a **simple looping** mode or on a **weekly schedule**. Setting up simple looping mode is as easy as adding and rearranging media files from Windows Explorer for repeated playbacks, 24 hours a day. You can also schedule the player to turn off the video signal at certain times of the day. For most display screens, this will enter a power-saving standby mode.

Auto-update contents via widgets

Manager Express simplifies content update by using widgets*. User can schedule to display clock, news, weather, and many more. All these contents will automatically update themselves as long as the device is connected to Internet. No more out date contents on your screen!

Multi-zone content layouts

Multi-zone split screen of various videos, graphics, and text tickers are fully supported for HD signboards and media players in the program's user-friendly interface. Simply export a new text file to update the scrolling on-screen message on-the-fly.

* Applicable to certain players only
