Installing Security Certificates

America

20 Fairbanks, Ste, 170 Irvine, CA 92618 California, U.S.A

Taiwan

114, 3F, No. 21 Ln. 168, Xingshan Rd. Neihu Dist., Taipei, Taiwan

This printed quick guide provides a quick walkthrough of the set up process.

Technical Spec

You will need:

- Android 7.1 Media Player with Latest Firmware (2.X.X or above)
- Security Certificate Files

Security Certificate Installation SOP

- 1. Copy and Paste the CA certificate (*.pem) and User certificate (*.pfx) to USB drive.
- 2. From Basic Settings Page, click on **Time Zone** to access the Android Native Menu. Then click on the Menu Icon on the top left-hand corner and select **Security**.

Installing Security Certificates

Quick Start Guide

3. Under Credential Storage, select Install from SD card.

≡	Security	
	Credential storage	
	Storage type Hardware-backed	
	Trusted credentials Display trusted CA certificates	
	User credentials View and modify stored credentials	
	Install from SD card Install certificates from SD card	

4. Select the USB Drive and the CA certificate.

Open from				
0	Recent			
<u>+</u>	Downloads			
	XDS-1078 6.22 GB free			
ψ	USB STORAGE 8.41 GB free			

5. Name the certificates and choose your credential use. If certificate is for Network authentication (802.1x), select **Wi-Fi**.
