**Quick Start Guide** 

### SENSOR CONFIGURATION

Once installed, the SafeCount system needs some simple configuration in order to optimize for your building.

To start, open a browser on a **PC** and ensure that your PC is connected to the 192.168.0.XXX Wi-Fi network. (Note: Change the IP setting on your Router or contact your network administrator the network ID is not 192.168.0.XXX.)

Type in the following address in to the browser's address bar:

### 192.168.0.250/safecount

The **LOGIN PAGE** will then appear:

To access the **LOGIN PAGE** you will need to enter the following credentials:

USERNAME: admin PASSWORD: installer

Once logged in, you will have access to the SafeCount system MAIN DISPLAY as shown

below:

The DEVICE CONFIGURATION message that appears is expected as your SafeCount system has not yet been correctly configured.

Tap **OK** to acknowledge the warning and proceed with final configuration.

**Quick Start Guide** 

To access the required settings, tap the **MENU ICON** in the top right-hand corner of your screen, and then tap the **SETTINGS** option:

On the **SETTINGS** screen, you should enter the following details.

**LOCATION DETAILS** refers to the name of your store/building, and whatever you enter here will be displayed on the customer/visitor facing screen (if employed).

**CUSTOMER LIMITS** are the occupancy limits that cause the main screen to change through the various Red/ Amber/ Green colours.

**MAX LIMIT** is the value that turns red.

**HIGH LIMIT** is the value that turns amber.

Anything below these two numbers means the screen stays Green, and peop;le are allowed to continue entering.

Adding **OPENING HOURS** means that you can view historical data.

If you have muliple entrances/exits and have connected SafeCount Sensor Nodes, then the number of nodes connected will be displayed. If this number is lower than expected, please check all of your network connections.

If people are walking around undernearh your SafeCount sensor then you will start to see them moving around in the bottom left-hand conrner of the SafeCount systems settings view.

Once you are happy with all of the changes that you have made, please ensure you click the **SAVE ALL CHANGES** button before navigating away from the **SETTINGS** page.

**Quick Start Guide** 

### **TABLET CONFIGURATION**

1. Check network connection:

The IP address of the panel is displayed on the Home screen.

To get connected to the Sensor (Which IP is 192.168.0.250), make sure the IP of the panel is using the same network ID 192.168.0.XXX. Change the IP setting on your Router or contact your network administrator if you don't have the same network ID.

#### 2. Connect to the Sensor:

Note: Control your device with a mouse via USB if touch-screen is not supported on your panel.

I. Press **Set content**:

II. Enter the follow URL:

192.168.0.250/safecount

- III. Press Set.
- IV. Press Play.

**Quick Start Guide** 

V. The LOGIN PAGE will then appear:

VI. To access the **LOGIN PAGE** you will need to enter the following credentials:

USERNAME: admin
PASSWORD: installer

VII. Login to start using the system.

**Quick Start Guide** 

### SYSTEM USAGE

To start using your new SafeCount System, tap **the MENU ICON** in the top right-hand corner of your screen, and then choose a **VIEW** from those displayed.

#### **CUSTOMER VIEW**

This **VIEW** is intended for display at the door or building entrance.

**Quick Start Guide** 

### ATTENDANT VIEW

This **VIEW** is intended for use by a security guard or staff member who is in charge of managing door entries.

#### MANAGER VIEW

Here you can see the current **OCCUPANCY LEVEL** and where you have the ability to manual adjust the occupancy should the need arise. For example, if your building was already open prior to the system being started.

**Quick Start Guide** 

### HISTORICAL REPORT

This VIEW allows you to see the occupancy figures from the previous day for comparison purposes. You can also scroll down this page for additional graphs.

#### **SETTINGS**

As above already covered, this **VIEW** is for configuring the various occupancy limits and other settings relevant to your building.

**Quick Start Guide** 

## **Screen Customization**

To promote safety awareness, customized contents (texts, images, videos, web pages and more) can be added to the screen. For example:

Example: A split layout is added to the screen and important messages are added to the right.

To create appealing visual presentations, to use of multimedia contents like text, images and videos will be essential. SignApp Express will help users to create signage and distribute it to multiple devices easily.

## Add Awareness Messages to Your Screen

- 1. Install SignApp Express on your PC
  - I. Go to: <a href="https://www.iadea.com/products/signapps-express/">https://www.iadea.com/products/signapps-express/</a>

- II. Click GET FREE TRIAL.
- III. Fill the form and download the software.
- IV. Click Submit.

### **Quick Start Guide**

- V. Software will be downloaded.
- VI. Install it on your PC.
- 2. Update SignApp Express:
  - Run SignApp Express.
  - II. Go to Help > Check update:

III. Click **Download** to get the latest version.

IV. Wait for the download

- V. Follow the on-screen instructions to install the new version.
- VI. Click Finish to launch SignApp Express.

### **Quick Start Guide**

- 3. Multimedia contents will be organized as **Playlists**. Follow these steps to add an awareness message session on the screen.
  - Download the pre-defined template:
     <a href="https://support.iadea.com/hc/en-us/article">https://support.iadea.com/hc/en-us/article</a> attachments/900002624343/SafeCount 2Zone.pls
  - II. Go to the top left corner, click **File**, then click **Load playlist(s)**:

- III. A file dialog will pop up, select the downloaded template file and click **Open**.
- IV. A green tick will be displayed if the file is import successfully. Click **Close** for the next step.

V. Here is the imported playlist, double click the playlist thumbail on the left to start editing:

SignApps Express
File Language Tools Help

VI.

#### **Quick Start Guide**

VII. On the editing screen, click the image of the awareness message to make changes.

VIII. The edit options will be displayed at the right:

- Click + to add another image.
- Click x to delete the image.
- If there is more than 1 image, those images will be played as a slideshow.

#### Note:

URLs added to the sigage will be displayed as **HTML5** during the editing. It will be displayed normally on the tablets once it is deployed.

### **Quick Start Guide**

Besides using this template, users can also create a new playlist from scratch. For more information, check the user manaul of SignApp Express on <a href="https://support.iadea.com/hc/en-us/categories/115000904826-SignApps-Express">https://support.iadea.com/hc/en-us/categories/115000904826-SignApps-Express</a>

- 4. After the editing is done, distribute the new content to devices.
  - I. Press Save export to player.

II. The information of the panel will be shown, select your panel and press **OK**.

III. The new content is now displayed on the panel. Click **Close** to finish the process.
